DOWNTOWN ADVISORY BOARD

WHAT HAVE YOU LEARNED ABOUT RECYCLING AND BEING GREEN THAT YOU HAVE CARRIED OVER TO YOUR HOME AND BUSINESS?

THE COMMUNITY LEADERS AND LEGENDS THAT HAVE HELPED BUILD THIS AREA AND GUIDE OUR COVERAGE OF IT

ERIC BONNETAIN
MANAGER,
CIPRIANI WALL STREET

I already have been taking environmentally friendly steps at home, so it's a natural extension to take similar measures at work. I've invested in an energy-saving computer and set the computer to sleep mode when I'm away for short periods of time. I also have reduced printer use and print on both sides of the paper.

DONALD ROLAND,
M.D., FACS
BOARD-CERTIFIED
PLASTIC AND
RECONSTRUCTIVE
SURGEON
**CHAIRPERSON
OF DOWNTOWN
MAGAZINE'S
ADVISORY BOARD**

Being green has become a family affair for us. My kids have become experts at separating our trash into one of three designated bins. Professionally, my office is gearing up to switch over to electronic medical records, which will have a huge impact on our paper consumption over the next 25 years.

DREW ALEXANDER
HEAD OF SCHOOL,
LEMAN MANHATTAN
PREPARATORY SCHOOL

Working in a school setting, educators have the responsibility of modeling the triple R's: reducing, reusing and recycling as the green way of life. Using motion sensors on water and lights, adjusting thermostats, using mass transit are all planet-friendly measures that support a green planet for future generations.

MELISSA ANDREEV
PRESIDENT OF THE FIDI
ASSOCIATION AND
MANAGER AT LA MAISON
DU CHOCOLATE, WALL
STREET

Growing up a few blocks away from the beach in Belmar, New Jersey, I was taught to respect the water in every aspect. My first "green" lesson was about water pollution. I encourage my friends and co-workers to conserve water at all times. Clean running water is a luxury that we should all be thankful for.

CHRISTO
INTERNATIONALLY
ACCLAIMED HAIRSTYLIST

In my salon, I have a cut-off switch that allows me to turn off all the electricity in the salon at the end of the day from all my outlets. In addition, all my lights are energy efficient. I think we have to try to make a difference, especially with global warming!

AARON DWORKIN
FOUNDER OF
THE SPHINX
ORGANIZATION AND
A MEMBER OF THE
NATIONAL COUNCIL
ON THE ARTS

At Sphinx, we are undergoing a green evolution by sharing our program materials electronically. All our design materials are virtual, allowing for broader usability and maximizing use of technology to ultimately uphold our collective responsibility as citizens of the planet.

ALBERT M. LEFKOVITS,
M.D., P.C.
ASSOCIATE CLINICAL
PROFESSOR OF
DERMATOLOGY AT
MOUNT SINAI
SCHOOL OF MEDICINE

We sort and recycle at home and in the office. Plastic bags from the laundry are recycled to pick up waste from our dog, Chase. In my office we reuse the clean sides of nonprivate faxes. At home and in my office we turn off unneeded lights and, whenever possible, we use green products.

RORY McCREESH
FOUNDER,
DUCE CONSTRUCTION

With recycling being such an important factor for our future, we try to recycle everything we can at home. In business, I encourage and educate customers through the Duce Green Division of our company.

JULIE MENIN
CHAIRPERSON OF
COMMUNITY
BOARD 1, SERVING
LOWER MANHATTAN

I am proud that we were able to locate the site for the first green school in New York City, PS. 276, in Battery Park City.

JEFFREY MENKES
PRESIDENT AND CEO,
DOWNTOWN HOSPITAL

In league with Con Edison's Energy Efficiency initiative, New York Downtown Hospital has developed a green energy strategy that includes installing high-efficiency motors, which will provide superior and more energy-efficient ventilation, water flow and environmental controls.

DREW NIEPORENT
CHAIRPERSON OF
THE MYRIAD
RESTAURANT GROUP

One of the best things that has come out of the baby boomer generation is the implementation of green efforts. When I was a kid, there was no such thing as recycling. Newspapers, soda cans, everything went together into the trash. Now both at home and in our restaurants, green efforts are in place.

LUIGI ROSABIANCA
PRINCIPAL AND
FOUNDER OF
ROSBIANCA &
ASSOCIATES, PLLC

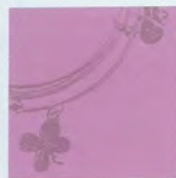

In a climate of feel-good sentiments, "Green" gets its share of attention. Living an environmentally responsible life should not be defined by an acronym, certification designations or embraces to plant life. Be it water usage, cycling, public transportation or the like, our habits can make an impact.

JEFF SIMMONS
VICE PRESIDENT FOR
COMMUNICATIONS,
DOWNTOWN
ALLIANCE

Being green is all about being smart. My partner works for Con Edison and practices what he preaches, and so do I. I don't leave lights on when leaving a room, I don't hike up the thermostat or AC unit and I use energy-efficient light bulbs!
